

My name is Franz Galle, I am a car mechanic at the vehicle factory. Permit me to introduce to you the Trabant Saloon and Universal.

To praise the Trabant would mean carrying coals to Newcastle.

The appreciation of contented customers bestowed upon the workers, engineers, technicians and economists is not only a great honour to us but also an obligation. I have been a member of the factory rallye team for 16 years and have tested the vehicle on numerous European tracks.

I am firmly convinced when I say that: to drive a Trabant means to drive with safety and comfort. Its manoeuvrability permits this small car to master all traffic situations. According to experience, four grown-ups have sufficient space in the saloon on long holiday trips.

The Trabant Universal represents a solution beyond all expectations.

Open the rear door upwards, fold down the rear seats – and you have enlarged the luggage space from 450 to 1,400 litres.
