

An unused automobile at only \$2,675?

We recommend Trabant

Worn or broken parts easily replaceable! Rubber sponge door seals, noiseless rear coil springs, 450 liters of luggage space included in the price! More ground clearance with less fuel consumption than Lamborghini Countach! And never a dealer telephone or address to remember! This is Trabant from IFA-Mobile (DDR)! Allow 4-6 months for delivery!

Introduced only a few pages ago, Trabant is already the only \$2,675 new car Americans may purchase!

Think of a two-stroke motor with more power than the winner of the 1894 Paris-Rouen race. Front-wheel drive that you can experience in a conventional car only by going fast, backwards. Smart dual-tone horn! Daring V-belt transmission!

For the gentler sex: pleated seats you can wash at home, full-width parcel shelf, glazed windows all-around. With a seatbelt and headrests, safety for both head and body. That translates to peace of mind!

INVISIBLE DEALER NETWORK

Trabant is the first product of East German precision craftsmanship to be declared so reliable that dealer servicing is unnecessary.

In fact, there are no Trabant dealers in America to perform poor service and overcharge for spare parts!

Yet Trabant is manufactured from tried and tested *duroplastic* material. You know, like Pontiac Fiero construction. Thermal insulation? Why, excellent! Crash repair? You will look forward to accidents!

2 COLOR CHOICES

Color choices are cinder grey or egg beige. Further standard fittings are reversing lights; draught-free ventilation; hazard warning signal flasher!

Each model of the Trabant car can be equipped with Hycomat. Hycomat is an automatic clutch working on hydraulic and electric principles. It is particularly convenient for disabled persons!

\$2,675 OF UNKNOWN VALUE

A mystery to America, Trabant has been described as follows: "modest in its requirements . . . easy to maintain . . . with spacious boot." (Trabant brochure)

So buy the Trabant 601S de luxe, the \$2,675 gasoline-powered, four-wheeled car. The firm of IFA-Mobile (DDR) has been building it for over 22 years.

Notice: the Trabant 601S de luxe may not conform to all safety regulations in your State. In most cases a waiver may be obtained.

Write for sales form. Many U.S. regions are yet available for distributorships.
